DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to a circuit array module structure, classified in class 361, subclass 728.
- II. Claims 5-27, drawn to the logic sequences and circuitry of a circuit array module, classified in class 326, subclass 39.
- III. Claims 28-37, drawn to defining configurations in a circuit array module, classified in class 716, subclass 16.

The inventions are distinct, each from the other because of the following reasons:

Inventions III, II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice a process of interconnecting different circuit modules in order to arrive at a specific functionality of the assembled modules. Moreover, the apparatus as claimed in group I can be used to house different types of electronic components other than those required for a circuit array module. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Jon A Gibbons(Reg. No 37,333)on 07/27/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
